

HOUSE FLY CONTROL:

Composition:

Biosensory attractants, Phytochemicals and phytosterols having insecticidal properties, Tender coconut, Biopreservation using yeast metabolites.

DIRECTION TO USE:

Step.1: Pour Att2 into a clean, used gunny bags or trays or plates with maximum exposure area to attract flies.

Step.2: Place the gunny bags or trays or plates in highly fly populated areas like Litter, feed storage areas. (Make sure atleast there is 3 meters between two trays)

Step.3: After every 3-4 days of exposure, remove the media, clean them with hot water, and refill with Att2 before placing them again.

PRESENTATION:

1 Litre.
