

DiTox *Regular*

COMPOSITION :

Natural dipolar Phyllosilicates, Liver stimulants.

1. Binds and eliminate wide range of mycotoxins ensuring safer and quality feed for poultry.
2. Phyllosilicates adsorb toxins effectively due to their high surface area and layered structure, allowing them to trap and neutralize harmful substances within their interlayer spaces.
3. Liver stimulants in DiTox Regular improve liver function by enhancing detoxifying enzymes, and supporting nutrient metabolism, leading to better digestion and overall liver health.

DOSAGE:

Regular: 1 kg/tonne of feed

High moisture and toxin suspected feed:
2 kg/tonne of feed

Or

As advised by the Veterinarian.

PRESENTATION : 25 KG Bag
