

HYGIN-TACT- 20

Hatchery & Farm

Rapid and Long acting Disinfectant

QAC are cationic surfactants that impact cell walls and membranes. Their permanently positive charge makes them bind readily to negatively charged surface of most microbes. QACs are generally very stable and mostly unaffected by pH levels. It can be used as cleaner and sanitizer.

In Hygin Tact – 20 along with QAC, Glutaraldehyde works better. Glutaraldehyde is a potent disinfectant.
