

***NATUMERIC* Plus**

(Natural Growth Enhancer)

NATUMERIC Plus

(Natural Growth Enhancer)

Phytobiotics present in Natumeric plus involves enhanced feed intake, secretion of digestive enzymes, immune stimulation, antibacterial, antiviral, and antioxidant properties.

Composition

Turmeric : The rhizome of turmeric is the rich source of bioactive compounds such as curcumin, curcuminoid, demethoxy curcumin. Turmeric supplementation stimulates digestive enzymes secretion such as lipase, maltase, amylase, chymotrypsin and trypsin. The immuno modulatory effect boosts the immune system which provides instant immunity against pathogen. Turmeric can regulate inflammation and act as an anti-inflammatory and antioxidant

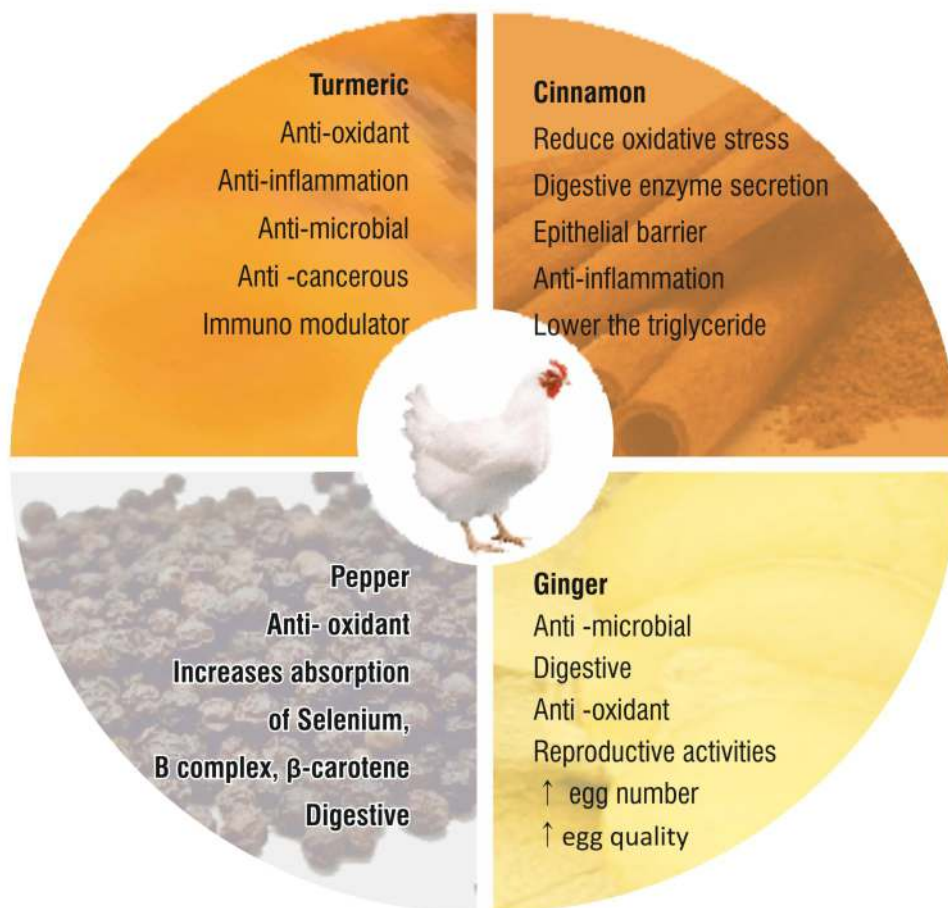

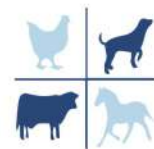

Ginger : Pharmacological character of ginger is analgesic, anti- inflammatory, gastro intestinal modulating agent, antimicrobial, and antioxidant. Presence of gingerols, shogaols and zingrone are natural additive on growth performance, carcass characters, Egg production and egg quality, reproductive performance, nutrient digestibility, immune response and anti- microbial.

Zinger oil contains 69 ingredients which act as an antifungal, antioxidant and antimicrobial.

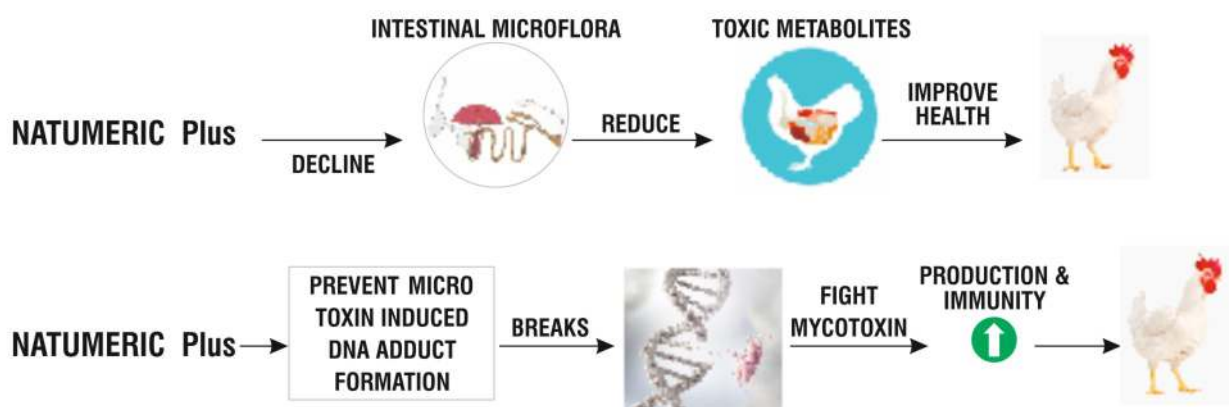

Pepper extract : Rich source of Glutathione Peroxidase, Glucose 6 phosphate dehydrogenase.

The antioxidant radical scavenging properties of black pepper well documented. Piperine increases absorption of selenium, vitamin B complex, β -carotene and curcumin. It increases the flow of digestive juices.

Cinnamon : 41 compounds are identified in cinnamon essential oil. Cinnamaldehyde is a major active ingredient of cinnamon. Cinnamaldehyde increases the pancreatic and intestinal enzymes.

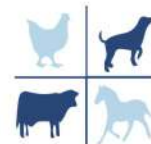

MOA

- It also helpful in reduction in oxidative stress and increase in antioxidant activity in various tissues and thus improve health

NATUMERIC Plus

BENEFITS

- ✓ It replace antibiotic (CTC, Tylan etc) in feed.
- ✓ Curcumin stimulates the digestive system by promoting the intestinal lipase, maltase and sucrase activities as well as the secretion of pancreatic amylase, lipase, chymotrypsin, and trypsin.
- ✓ Improves performance and nutrient utilization.
- ✓ Enhancing efficiency of immune system
- ✓ Prevents bacterial infections and helps to achieve extra growth.
- ✓ Reducing incidence of diarrhea & lowering mortality rate
- ✓ Reducing environmental pollution
- ✓ Maintain the liver health of birds

ADVANTAGES IN POULTRY

- ✓ Cost effective
- ✓ Increased egg production
- ✓ Serum lipid profile regulation
- ✓ Healthy and increased growth rate
- ✓ Immunomodulation

WHY TO BE USED IN POULTRY

- ✓ Non-toxic
- ✓ Natural antibiotic
- ✓ Residue free
- ✓ Ideal food additive

PRESENTATION

In Liquid: 3 kg, 25 Kg Pack

Powder: 20 Kgs HDPE pack

DOSAGE

IN POWDER : Breeders: 500g - 1kg/ton of feed.
Layers and Broilers: 500 g/ton of feed.

IN LIQUID : Breeders: 500g - 1 kg/ton of feed.
Layers and Broilers: 500 g/ton of feed.
Water: 1ml/L of water.

*As advised by the Veterinarian/ Nutritionist.

STORAGE

Keep in cool & dark place

(An ISO 9001 : 2015 Certified Company)

GMP & HACCP Certified

Formulated and Manufactured By :

ZENMAK NUTRIGENCIES AND HEALTH PVT. LTD.
