

SANQUAT-20

Powerful Broad Spectrum disinfectant

Saniquat is a positively charged poly cationic ions and permanently charge independent of the pH of their solution. Saniquat is lethal to wide variety of organism which includes fungi and viruses also. It acts by disrupting cell membrane of viral envelope. Saniquat is cationic detergents as well as disinfectant as such can be used to remove organic material.

COMPOSITION

N,N' - 1,2- ethanediylbis[N-(carboxymethyl)-, tetrasodium salt.....4 %
Quaternary ammonium compounds.....4 %
di-C8-10- alkyldimethyl, chlorides
Quaternary ammonium compounds.....2 %
benzyl-C12-16-alkyldimethyl, chlorides

BENEFITS

- Effective in presence of hard water, organic matter
- Effective at high pH
- Non corrosive, non toxic and user friendly
- Excellent antimicrobial and antibiofilm activity
- Suitable for all hatchery equipments
- Water treatment as well as hygiene and material protection applications

APPLICATION RATE

Disinfection	4 ml in 1 litre of water
Water sanitation	1 ml in 10 litre of water
Severe contamination	10 ml / Ltr.

PRESENTATION

5 Ltr. & 1 Ltr.

STORAGE

Keep in cool & dark place
