

COMPOSITION :

XShell-DS is the combination of SCFAs, MCFAs, Vitamin-D3 from plant origin and essential trace elements. This formulation offers a multifaceted approach to promote egg shell strength, vitality, bolstering immune function and enhancing overall quality of eggs.

BENEFITS :

- Facilitates the synthesis of matrix protein such as ovocleidin-17, which serves as a scaffold for calcium carbonate deposition.
- Serves as a cofactor for Carbonic anhydrase, involved in deposition of Calcium bicarbonate.
- Cross-links the collagen fibres essential in formation of egg shell membranes.
- Helps for the development of strong and resilient eggshells.
- Supports eggshell integrity by minimizing the risk of shell degradation.

DOSAGE AND ADMINISTRATION

500 - 1 kg / tonne of feed
or

As advised by the Veterinarian /
Nutritionist

PRESENTATION : 25 KG bag
