

ProZenBio-BSB

COMPOSITION :

▶ <i>Bacillus subtilis</i> 2057	2x 10 ⁹ cfu/g
▶ <i>Bacillus licheniformis</i> PBL01	2x 10 ⁹ cfu/g
▶ <i>Bacillus amyloliquefaciens</i> 10440	5x10 ⁸ cfu/g
▶ <i>Saccharomyces boulardii</i> 5375	5x10 ⁸ cfu/g

DOSAGE AND ADMINISTRATION :

Broiler / Layer / Breeder: 350-500 g /
tonne of feed (or) As advised by the
Veterinarian / Nutritionist

PRESENTATION : 25 KG bag

BENEFITS :

- ▶ Thermostable organisms with highest recovery in pellet feeds .
- ▶ Promotes the proliferation of potentially beneficial micro organisms in the gut of poultry.
- ▶ Enhances the production of anti-microbial peptides, thereby gives complete protection from *E.coli*, *Salmonella* & *Clostridial* organisms.
- ▶ Eubiotic combination of poultry specific microflora strains.
- ▶ Increases intestinal mucosal barrier function by secreting mucins and defensins.
- ▶ Consistent usage decreases incidence of wet litter in poultry farm.
