Viral and bacterial infections are a serious problem threatening poultry sector, with huge economic loss. Triple Salt is an oxidizing agent – Oxidizes cell membrane of micro-organism. Oxidation decomposes microbial cell wall, stops trans membrane transport of molecules, affects all structures inside microbial cells and causes death of microbes.

FEATURES :

Triple salt is capable of inactivating non-enveloped viruses which are more resistant to other common disinfectants. Triple salt causes oxidation of viral proteins .

1. A rapid, long-lasting and powerful broad-spectrum disinfectant yet safe biocidal disinfectant
