

ZenAct-PRO

ZenAct-Pro : Advanced Gut Health and Performance Booster for Poultry

Our innovative poultry supplement, ZenAct-Pro is specifically formulated to enhance gut health, improve intestinal integrity and optimize overall poultry performance. By targeting key factors responsible for gut health, ZenAct-Pro effectively reduces loose droppings and minimizes the percentage of dirty eggs, ensuring improved hygiene, better productivity and increased profitability at the farm level.

COMPOSITION

This advanced formulation combines naturally derived gut-acting probiotic strains, an epithelial cell enhancer that fortifies the intestinal lining, SCFAs, MCFAs, Mannans, Catalytic proteins, NSPs digesting enzymes and Astringents.

1. By promoting the growth of beneficial bacteria and inhibiting harmful pathogens, the gut-acting probiotic strains in ZenAct-Pro ensure a balanced microbiome.
2. The epithelial cell enhancer and SCFAs work together to reinforce the integrity of the intestinal lining. A strong intestinal wall prevents harmful pathogens from passing through, leading to healthier digestion, reduced inflammation and fewer cases of loose droppings.

Before using ZenAct-Pro

After using ZenAct-Pro for 10 days

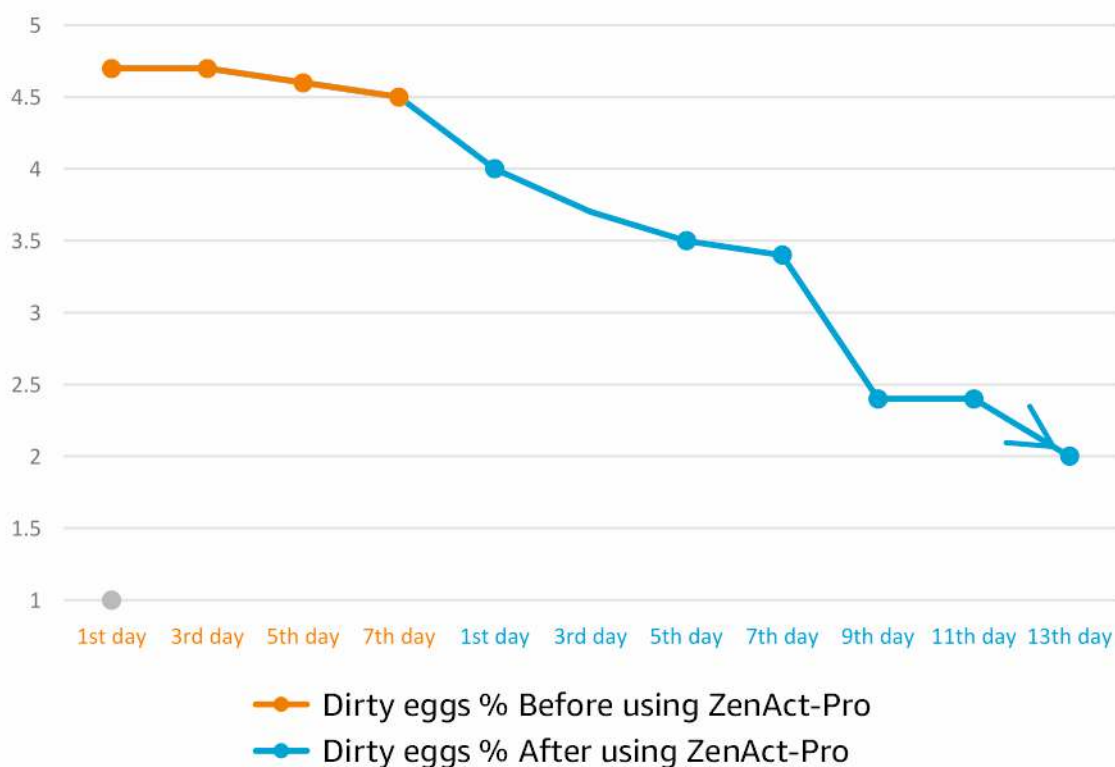

By controlling the wet litter problem, we also effectively reduce the fly population by inhibiting the growth of larvae. Dry litter creates an unfavorable environment for larvae, limiting their development and curbing fly infestation.

3. MCFAs are easily digestible fats that provide quick energy to the bird's system. They possess antimicrobial properties that target harmful bacteria in the gut, supporting the balance of gut flora and improving digestion.
4. Catalytic proteins and NSP digesting enzymes in ZenAct-Pro enhance metabolic and digestive processes by breaking down complex feed ingredients into more readily absorbable forms. This ensures better utilization of nutrients, reduces the amount of undigested feed in the gut and minimizes the risk of loose droppings due to poor digestion, while also lowering ammonia levels in poultry housing.
5. Astringents in ZenAct-Pro has moisture binding properties that ensure firmer droppings, leading to better litter conditions. With cleaner litter, hens are less likely to come into contact with contaminants, directly reducing the percentage of dirty eggs.

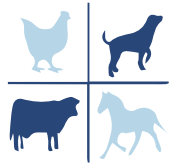

Trial report for Dirty Eggs %

Trial conducted in 64 weeks old layer flock

Dirty eggs % was recorded for 1 week before starting trial with ZenAct-Pro.

Decrease in Dirty eggs % was noticed after 2 weeks of supplementing ZenAct-Pro in feed.

BENEFITS:

- Promotes better digestion and nutrient absorption, leading to firmer droppings and overall healthier birds.
- Decreased incidence of dirty eggs results in higher market value and less wastage, improving overall farm profitability.
- Healthier birds with better digestion lead to more consistent egg production and improved growth rates, enhancing overall farm productivity.

DOSAGE:

During severe Loose droppings / Dirty eggs conditions – 2 kg / Tonne of feed for 10 days.

For regular use – 1 kg / tonne of feed

or As advised by the Veterinarian

** 2 kg/tonne of feed - Total replacement of Enzymes and Probiotics in feed.

1kg/tonne of feed - Replacement of half the dose of Enzymes and Probiotics in feed.

PRESENTATION:

25 KG Bag

SHELF LIFE:

24 months from the date of manufactured.

(An ISO 9001 : 2015 Certified Company)

GMP & HACCP Certified

Manufactured and Marketed By :

ZENMAK NUTRIGENCIES AND HEALTH PVT. LTD.

Regd. Off: No. F2, Sand Stone Apartments,
